Electronics and Communication Engineering
CGPA-8.56

Percentage-90

Percentage-86

PROJECT

- ACCIDENT ALERT SYSTEM

- Built a system using Arduino, accelerometer, and vibration sensors to detect collisions.
- Integrated GPS and GSM modules to send real-time SMS alerts with location data

-BOOK STORE

- Built modern e-commerce landing page with HTML5, Tailwind CSS featuring responsive hero, product grids, offers, and interactive Buy buttons.
- Created mobile-first design using flexbox/grid with hover effects, search bar, and student discounts for optimal UX across devices.
